TASK-2

BUG REPORT([Desh Career | Home](#))

1.Issue: Website responsiveness on different screen sizes.

Expected Behavior: The website should be responsive and adapt to different screen sizes, ensuring proper functionality and visual presentation.

Steps to Reproduce:

- Open the website on different screen sizes, such as tablets or mobile devices.
- Observe the website's behavior and appearance in each screen size.

Actual Result: The website does not function correctly or display appropriately on tablets or mobile devices.

Suggested Solution: Implement responsive design techniques using CSS media queries and flexible layouts to optimize user experience on various devices.

Impact: Poor responsiveness may lead to a negative user experience and discourage mobile or tablet users from accessing the site.

Severity: High

2.Issue: Ineffective placement of the subscribe button.

Expected Behavior: The subscribe button should be prominently positioned to attract customer attention.

Steps to Reproduce:

- Visit the website.
- Scroll to the bottom section of the page.
- Observe the location of the subscribe button.

Actual Result: The subscribe button is located in the bottom section of the website.

Suggested Solution: Reposition the subscribe button to a more visible location, such as the header or sidebar.

Impact: The current placement may result in fewer subscriptions. Repositioning the button can improve conversion rates.

Severity: Medium

3. Issue: Incorrect positioning of the categories section.

Expected Behavior: The categories section should be appropriately placed for easy navigation.

Steps to Reproduce:

- Visit the website.
- Navigate to the categories section.
- Observe the current position of the categories section

Actual Result: The categories section is not in the correct position on the website.

Suggested Solution: Move the categories section to a more suitable location, such as the sidebar or prominent area on the homepage.

Impact: Incorrect placement may cause user confusion and difficulty in finding specific content or products.

Severity: Low to Medium

4.Issue: Inconsistent UI design and styling of the contact us form.

Expected Behavior: The contact us form should have an attractive and consistent UI design.

Steps to Reproduce:

- Navigate to the contact us page or section of the website.
- Locate the contact us form.
- Observe the UI design and styling, specifically the "Get in touch" sentence.

Actual Result: The contact us form has an unattractive UI design, and the sentence "Get in touch" has a different color, causing inconsistency in the styling.

Suggested Solution: Improve UI design by ensuring consistent styling throughout the form.

Impact: Unattractive and inconsistent design may negatively impact user experience and discourage form submissions.

Severity: Low to Medium

5.Issue: Inconsistent formatting in the card section.

Expected Behavior: The formatting of text in the card section should be consistent.

Steps to Reproduce:

- Navigate to the card section of the webpage.
- Observe the formatting of the text, specifically the "5 Min read" portion.
- Compare it with the formatting of other text elements within the same section.

Actual Result: The "5 Min read" text is displayed in italics while other text elements are not.

Suggested Solution: Ensure consistent formatting across all text elements in the card section.

Impact: Inconsistent formatting can disrupt visual consistency and readability.

Severity: Low

6.Issue: "Home" page location in the footer instead of the navigation bar.

Expected Behavior: The "Home" page should be included in the navigation bar for easy access.

Steps to Reproduce:

- Visit the website.
- Observe the navigation bar at the top of the page.
- Verify if the "Home" page link is present in the navigation bar.

Actual Result: The "Home" page link is located in the footer section.

Suggested Solution: Move the "Home" page link from the footer to the navigation bar.

Impact: Placement in the footer may cause confusion for users seeking quick access to the homepage.

Severity: Low to Medium

7. Issue: Mixed language content on the website.

Expected Behavior: All content on the website should be consistently displayed in a single language, either Bengali or English.

Actual Result: The website contains a mix of Bengali and English content.

Suggested Solution: Ensure consistent language usage throughout the website by either translating the Bengali content to English or providing a language selection option for users.

Impact: Mixed language content can lead to confusion and difficulty in understanding for users who are not familiar with both languages. It may result in a poor user experience and discourage users from engaging with the website.

Severity: Medium
